CAP is a non-profit before and after school child care program with limited funding resources. As a convenience to families and children and to stay connected from one school year to the next, CAP has created a summer child care program which includes summer activities and play as well as weekly field trips. *Summer prices are the direct result of CAP's inability to absorb the annual financial losses from this program. Summer prices reflect the same hourly rate as our school year program.*

We thank you for choosing CAP to meet your child care needs!
